AWDI is an Energy Star Partner

PLEASE FILL OUT ALL SECTIONS CAREFULLY. MAKE A COPY OF THIS COMPLETE FORM FOR YOUR RECORDS.

Name of Company:

Address:

City, State, Zip

Telephone: (main) **Contact:**

E-mail:

Website:

Terms and Conditions:

As a licensed Energy Star fabricator, we will implement the Energy Star Version 6 Installation Compliance on-line program in a simple and effective manor keeping your company's identity, but under the AWDI "best practices" umbrella:

1. In concert with your IT people, we will make a custom landing page accessible from a link you put on your own website. This will allow AWDI to be responsible for the Installation Best Practices content, but carry your name in compliance with the Energy Star requirements**. This page will contain your identity and logo (or any identity you want).

2. The installation blocks will be linked to our server however the instructions will be displayed in your website - no one will have to leave your site, but the instruction pdf files will come from ours. AWDI will pay all hosting fees for your Instruction Portal.

3. For copyright control, the instructions will be locked to download or printing. If you'd like those services available we can accommodate. This moves the responsibility from your company to between the visitor and AWDI and protects our copyrights. This is an option we can explore and it is flexible enough to engage it if and when it becomes necessary.

4. License/Subscription per Energy Star Certified Company will be charged at the special net rate of \$890* per year (upfront payment). The contract is simple: AWDI will supply Energy Star compliant library of installation instructions, with a personalized web page, accessible from your website and supplied from our server. We will provide the service all the way until December 31, 2017 at which time the subscription/license would be renewable on annual basis. Your payment will last the rest of 2016 and all of 2017.

5. There is a one-time setup/programming fee of \$125.00 with contract signing*.

6. As an Option, we can exchange, modify or expand any of the sections, or add specific sections for your company. Each change is reduced from \$100 to \$50.00.

7. We will provide a FREE QR Code, carrying your install URL (FREE custom web address for your company), for you to place on your windows/literature to show the link to the library portal, so smart phones, etc. will go directly to your portal page.

8. Once we receive your application we will obtain your custom URL and prepare your portal page and QR Code and supply a Letter of Agreement with these terms for you to sign. It will form the basis of our agreement.

9. The AWDI/WIXSYS website and initiative will meet or exceed the EPA/Energy Star Version 6 requirements, and for any discrepancies we will make the needed corrections, adjustments, and/or additions to make them compliant. In the event we fail to provide a fully compliant solution, we will make a full refund. Periodic changes will be made as required by EPA, DOE or Energy Star.
